	BUY M-REVITALIZER
Description	
To match desired level! Especially for men, developed a new anti-aging and regenerative face cream. Its main function is to prevent and slow skin aging. The complex of highly active peptides has a strong revitalizing effect: with its help, it is possible to reduce the depth of wrinkles, to eliminate the first signs of skin aging, to make the skin firm and smooth. Synergy of vegetable extracts and low molecular weight hyaluronic acid provides moisturizing and regenerating effect.	
Effect	
• delays the wrinkles • moisturizes and nourishes the skin, protecting it from oxidative stress • slows the aging process of the skin • improves the complexion and skin texture • has the strong regenerating effect • soothes the skin after shaving
