

INTENSIVE FACE CREAM

	❖ Peptide Cosmetics ❖ Reviline Pro ❖ Intensive face cream
	Vendor code: 60901
	<u>BUY INTENSIVE FACE CREAM</u>
Description	
Contains a physiologically active synthetic peptide complex from vessels	
Benefits:	
• strengthens and regulates the permeability of the walls of the vessels in the skin, • improves skin condition, • ensures intensive nourishing of the skin cells, • restores natural skin barrier, • stimulates and activates the activity of skin cells, accelerates the process of updating them, which results in improving the complexion, reducing appearances of broken capillaries on the face, give the skin the appearance of freshness and softness, • slow down the aging process.	
Ingredients	
Purified water, olive oil, cocoa butter, ethylhexyl cocoate, sorbitol, Capri-capric triglycerides, wax emulsion, stearin cosmetic monostearat glycerin, cyclomethicone, phenoxyethanol with ethylhexylglycerin, dimethicone, and benzizotiazolinon methylisothiazolinone, triethanolamine, citric acid, peptide complex from vessels, perfume composition.	
Application method	
Morning and / or evening, apply with light massage movements to already cleansed face and neck.	
Main components	
Vessel peptides	

Peptides from vessels - regulate metabolic processes in the vascular wall, normalize vascular tone, prevent the increase in the concentration of cholesterol in the blood and the development of hypercoagulability, restore the microcirculation in organs and tissues under the influence of environmental factors and emotional stress.

Microcare SI

Microcare SI - a unique combination of active ingredients, the liquid product has high transparency and broad-spectrum activity against bacteria, yeasts and molds in personal care products.

Chemical Identification

Active ingredients:

- 1,2-benzisothiazolin-3-one
- 2-methyl-4-isothiazolin-3-one

INCI:

- Benzisothiazolinone (and)
- Methylisothiazolinone

Toxicology

Active components of Microcare SI show a very low toxicity. Numerous of studies have shown that sensitization of potential products is much lower compared with the previously used isothiazolinones mixtures. Allergic reactions after sensitization are also different from other isothiazolinones.

Form release:

50 ml

Production

Scientific and Production Center of Revitalization and Health

St. Petersburg University of Bioregulation and Gerontology
