

PROTESTON - multicomponent preparation with peptides for masculine health

	❖ Healing and prophylactic preparations ❖ Proteston Vendor code: 60536 BUY PROTESTON
Description	
Proteston — is a multicomponent preparation with peptides for masculine health, created at the junction of peptide and nonpeptide bioregulators, to normalize the functions of the male reproductive system, improves the elasticity of blood vessels, increases the sexual constitution. Slows the growth of prostate adenoma. Promotes increased efficiency, is effective in mental and physical overwork, arterial hypotension. Proteston activates energy and metabolic processes in the body. It restores and normalizes the work of the immune, neuroendocrine and sexual systems of the male body, improves the functioning of the prostate gland. The combination of a dipeptide stimulating the functions of the male reproductive system and the most valuable active components — extracts of reindeer antlers, hemolones (dry blood of reindeer), pigeon cortex, zinc and selenium helps prevent the aging and allows to effectively correct the work of the male genitourinary system.	
Directions	
Adult men take 1 capsule 1–2 times per day during meals. Course duration 4–6 weeks. If necessary, you can repeat. There may be repeated practices during the year.
