Description	
New development of revitalization and the Centre for Health - drug "Trezvon" - is intended to alleviate the effect of alcohol Shot, reduce the symptoms of alcohol intoxication, and in exchange application - completely get rid of alcohol addiction. "Trezvon" - a completely natural product. It contains biologically active substances which have effective anti-inflammatory, hypolipidemic, hepatoprotective and choleretic effect. Also, the product contains components that have antitumor, antiviral and antibacterial activity. Included in the components have neuroprotective, anti-stress, sedative effect, improves metabolic processes in the brain tissue, restorative sleep, increase the resistance of neurons to intoxication. Thus, the use of the drug "Trezvon" reduces the destructive effect of toxins in alcohol and facilitates health. INDICATIONS: • alcohol intoxication; • the symptoms of alcohol withdrawal syndrome; • craving for alcohol; • support the work of the liver; • normalization of metabolism; • deterioration of self-esteem, apathy. According to statistics, every second person at least once in a life experience unpleasant psychological and physiological sensation after drinking alcoholic beverages. Headache, irritability, dry mouth - is not the whole list of the consequences of abundant libations. However, the body suffers from a hangover is much stronger than people know about it. The above symptoms - just the tip of the iceberg of the damage that causes excessive drinking, t. To. The most serious fracture occurs on the "inconspicuous" cellular level.	

Of course, the brunt falls on the liver in which the processing of ethanol. When entering large amounts of harmful substances that body can not cope with its processing, resulting in the accumulation of toxic substances, including free radicals, depleting the cells of virtually all tissues. Furthermore, in the process of splitting comprises reacting ethanol, reducing the level of glucose in the body, primarily in the brain, as glucose - the main source of energy for him. Therefore, at times a person experiences a hangover fatigue, weakness, his bad mood, decreased attention, speed of reaction. These and other processes occurring in the body after drinking alcohol, gradually, imperceptibly, but thoroughly destroy the body from the inside, bringing a premature old age and bringing severe illness.
