

REVILAB SL 02 - peptide preparation for the nervous system, brain and eyes

	❖ Peptides ❖ Revilab peptides ❖ Revilab SL 02 ❖ Peptides of brain, amphiblestrodes and vascular wall
	Vendor code: 61502
	BUY REVILAB SL 02
Description	
Peptide preparation for the nervous system, brain and eyes. It contains synthesized peptides of brain, amphiblestrodes and vascular wall.	
Purpose:	
• inflammatory and degenerative diseases of nervous system • prevention of eye diseases, also in eyestrain • disorders of the cornea and retina • acute disorders of cerebral circulation • rehabilitation after head injury	
Ingredients	
Purified water, chamomile extract, xylitol, PEG-40 hydrogenated castor oil, orange essential oil, taxifolin, licorice extract, propolis extract, peppermint extract, sodium saccharin, peptide complex AA-7, peptide complex AA-5, peptide complex AA-6, potassium sorbate, sodium benzoate, clove essential oil, natural flavor "Menthol", eugenol, limonene.	
Main components	
• Peptide of brain (peptide complex AA-5) It stimulates regeneration of neurons of the central nervous system. It normalizes cell metabolism and functions, and also restores the healthy function of nervous system. • Peptide of amphiblestrodes (peptide complex AA-6) It stimulates the retinal photoreceptors and cell elements. Peptide of amphiblestrodes helps to improve functional interaction of pigment epithelium and external segments of	

photoreceptors, and also accelerates the recovery of the light sensitivity of the retina. It normalizes vascular permeability; reduces the appearance of local inflammatory reaction; stimulates repair processes in diseases and injuries of the retina.

- Peptide of the vascular wall (peptide complex AA-7)

It regulates metabolic processes in the vascular wall. It can increase the elasticity of blood vessels and also can decrease the risk of damage to the vessel wall, bleeding and thrombogenicity. Peptide complex AA-7 improves blood circulation of organs and tissues.

- Extract of licorice

Has a wide range of substances useful to the human body. 27 flavonoids in the licorice have a versatile effect on the body — both spasmolytic, wound healing, and anti-inflammatory.

- Extract of propolis

Suppresses activity and kills bacteria and viruses, slows the growth of some of them. Propolis struggles with oral diseases caused by various types of infections, including herpetic, fungal, bacterial nature.

- Peppermint extract

Contains essential oil, flavonoids, tannins and bitter — these are the main active ingredients of this plant. The most important component in essential oil is menthol (up to 60%), which has an easy local anesthetic effect.

- Chamomile extract

Has a strong bactericidal, anti-inflammatory and soothing effect, and also stimulates blood circulation. These properties made chamomile an indispensable tool in the treatment of various inflammatory processes.

- Essential oil of orange

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

- Carnation essential oil

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

Directions

Drip 5–10 drops on the oral mucosa. Use 2 times a day. Check presence of natural sediment. Shake before use. Receiving duration: one month.

Form release:

10ml
