

REVILAB SL 05 - peptide preparation for the gastrointestinal tract

	❖ Peptides ❖ Revilab peptides ❖ Revilab SL 05 ❖ Peptides of liver, pancreas, lungs and stomach walls
	Vendor code: 61505
	BUY REVILAB SL 05
Description	
Peptide preparation for the gastrointestinal tract. It contains synthesized peptides of liver, pancreas, lungs and stomach walls.	
Purpose:	
• atherosclerosis and adiposity • cholecystitis • cirrhosis • chronic intoxication • metabolic disease (disbolism) • decreased liver function	
Ingredients	
Purified water, chamomile extract, xylitol, PEG–40 hydrogenated castor oil, orange essential oil, taxifolin, licorice extract, propolis extract, peppermint extract, sodium saccharin, peptide complex AA-10, peptide complex AA-15, peptide complex AA-11, potassium sorbate, sodium benzoate, clove essential oil, natural flavor “Menthol”, eugenol, limonene.	
Main components	
• Peptide of liver (peptide complex AA-10) It has biological activity which is manifested in stimulating the regeneration of liver tissue by recovering the synthesis of tissue-specific proteins and normalization of liver functions. • Peptide of pancreas (peptide complex AA-11)	

It contributes the normalization of the carbohydrate metabolism in increased glucose tolerance and diabetes type 2, and also improves the synthesis of digestive enzymes the pancreas and contributes the normalization of the digestive processes.

- Peptide of lungs and stomach walls (peptide complex AA-15)

It restores the function of the lungs and bronchi in acute and chronic respiratory diseases, and also restores the function of respiratory system to senior citizens. Peptide complex AA-15 has gastroprotective effect, which reduces the risk of gastric ulcer, but if the risk exists — gastroprotective effect leads to complete healing of the ulcer.

- Extract of licorice

Has a wide range of substances useful to the human body. 27 flavonoids in the licorice have a versatile effect on the body — both spasmolytic, wound healing, and anti-inflammatory.

- Extract of propolis

Suppresses activity and kills bacteria and viruses, slows the growth of some of them. Propolis struggles with oral diseases caused by various types of infections, including herpetic, fungal, bacterial nature.

- Peppermint extract

Contains essential oil, flavonoids, tannins and bitter — these are the main active ingredients of this plant. The most important component in essential oil is menthol (up to 60%), which has an easy local anesthetic effect.

- Chamomile extract

Has a strong bactericidal, anti-inflammatory and soothing effect, and also stimulates blood circulation. These properties made chamomile an indispensable tool in the treatment of various inflammatory processes.

- Essential oil of orange

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

- Carnation essential oil

Used to care for the oral cavity. Oil fights inflammation and bleeding gums, treats stomatitis, helps with periodontitis.

Directions

Drip 5–10 drops on the oral mucosa. Use 2 times a day. Check presence of natural sediment. Shake before use. Receiving duration: one month.

Form release:

10ml
